Google for Education

Google for Education

Bringing the best of Google to education, to help transform teaching and learning.

Enable education leaders to bring innovation to their schools at scale, with the peace of mind that they are investing in secure products that are flexible to their needs.

- Supercharge student outcomes
- Keep data private and secure
- Customize and scale
- Create value at all levels

Empower every educator by giving them simple, assistive tools so that they can focus on what they do best: helping students reach their full potential.

- Gain impactful teaching time
- Deliver continuous learning from anywhere
- Collaborate with peers and stakeholders
- Build better school-home relationships
- Access free training and PD

Equip every student with the tools and skills they need to be successful, by focusing on inclusivity and accessibility, so we can meet students wherever they are.

- Strengthen connections with educators
- Provide what they need to thrive
- Build skills with lesson-ready content
- Create inclusive environments

Evolve every day by continuing to listen to thousands of educators to create and improve upon our existing solutions, ensuring that the latest technology is reflected in the tools we build for teaching and learning.

- Take advantage of continuous innovation
- Deliver the latest features straight to users
- Continually improve student outcomes
- Streamline administrative tasks with AI/ML

Bringing the Best of Google to Education

With Chromebooks, every student and teacher can personalize

their learning environment, and every IT admin can unlock the full capabilities of Chrome OS with the Chrome Education Upgrade.

With Google Workspace for Education and Classroom, we support differentiated and engaging learning experiences. Plus, helpful

curricula and educational resources elevate class content at every step. Across it all, there is more choice than ever before.

Provide every student and teacher with a personalized learning environment.

Google for Education

chromebook

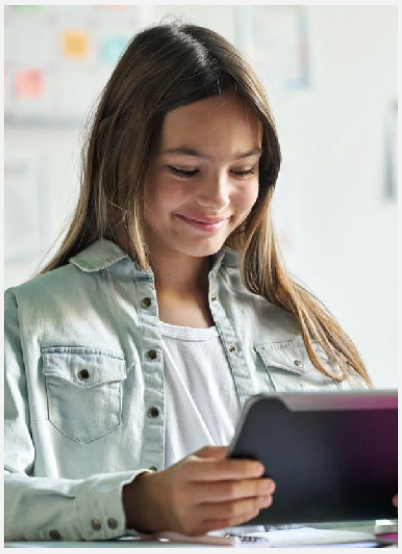

Design and deliver differentiated and engaging learning experiences that promote collaboration and creativity.

Google Workspace for Education

Google Classroom

Enhance and elevate class content with a host of educational resources and curricula.

- Applied Digital Skills
- Training & Professional Development
- CS First
- Teacher Center
- Chromebook App Hub

“You have to look at technology as a tool that will do something for the teachers, since they’re the ones making the magic happen in the classroom. Many teachers are ready to push their teaching to some unimaginable new levels.”

Ronald Carroll,

District Manager of Instructional Technology
