

With automated intelligence at the heart of **Aruba ESP**, predict, identify and resolve networking issues before they happen, with the industry's first **AI powered 'sixth sense' platform**.

**Intelligent networking and security, from mobile to the edge!**

Help customers harness the power of data across the network to help generate new revenue streams, improve efficiency and enhance the user experience!

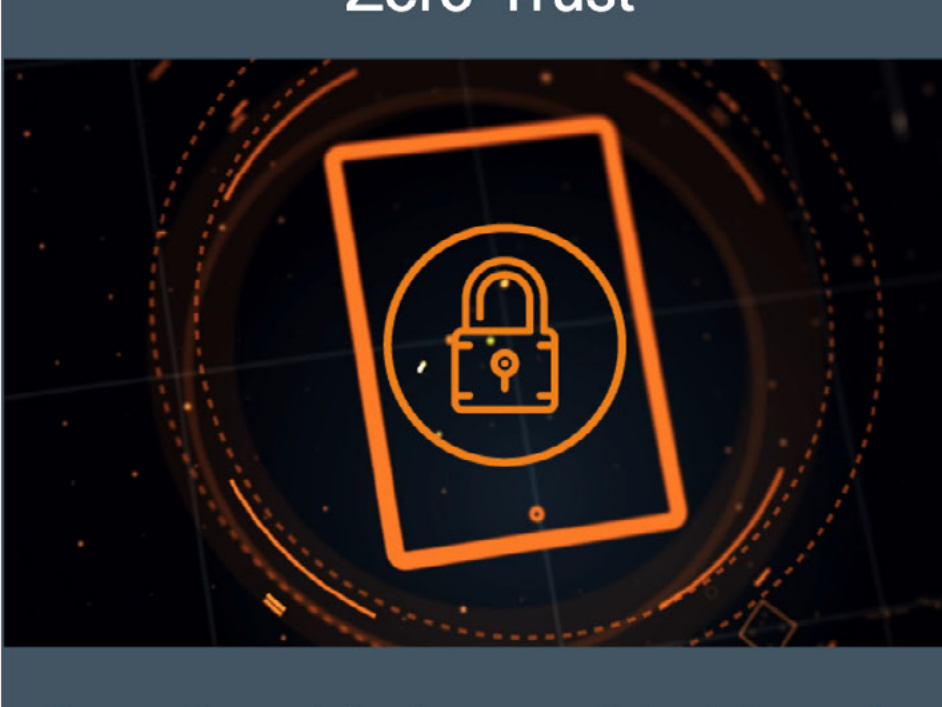

The Edge is where people, technology and data come together to do amazing things – where network users interact with devices and create effective digital experiences.

## Aruba ESP

EDGE SERVICES PLATFORM

Deployed on-premise through Aruba Central or As-a-Service

AIOps	Unified Infrastructure	Zero-Trust
		
<b>Insight</b> – highlight and resolve issues before they effect users or the business operations	<b>Visibility</b> – centrally manage and troubleshoot the entire network	<b>Security</b> – detect, prevent, isolate and stop network breaches before they happen

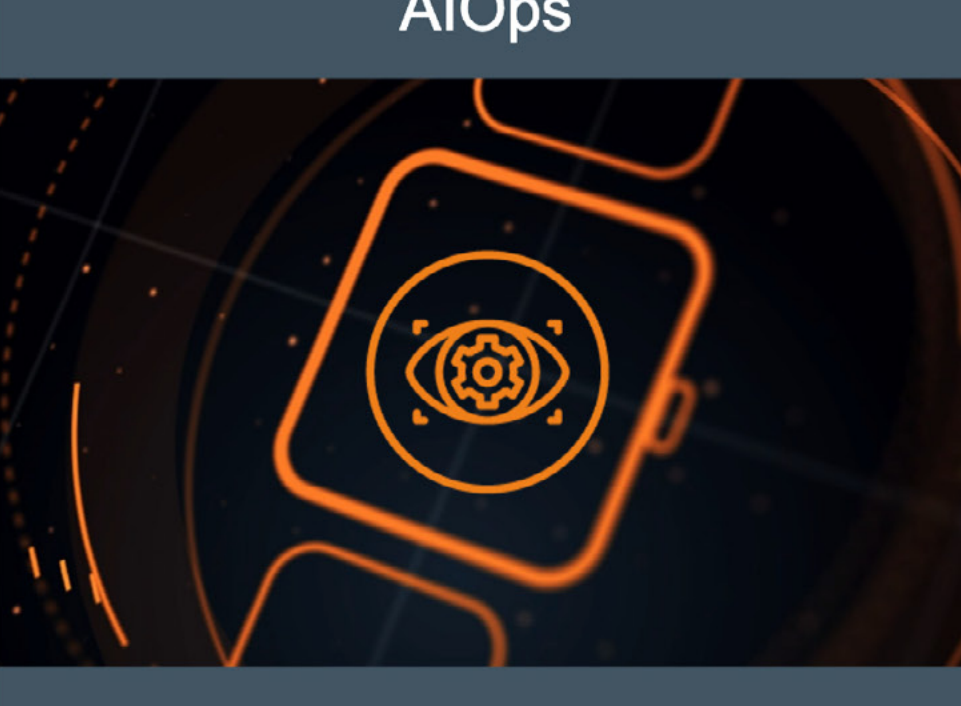

• AI and machine learning, combined with 360° network and user centric telemetry data capabilities reveal **network issues before they happen with 95% accuracy**  
 • APIs allow companies to **increase automation** through third party solutions

Keep pace with continually changing demands on the modern network.

  
**over 50%**  
 of data outside the cloud or data centre will be **generated on the edge** within the next two years

  
**35%**  
 of IT leaders plan to **increase their investment** in cloud-based networking in response to COVID-19

  
**only 18%**  
 of networks are designed to **identify and resolve problems automatically**

**Automation reduces manual errors by more than 75% and increases operational efficiencies**

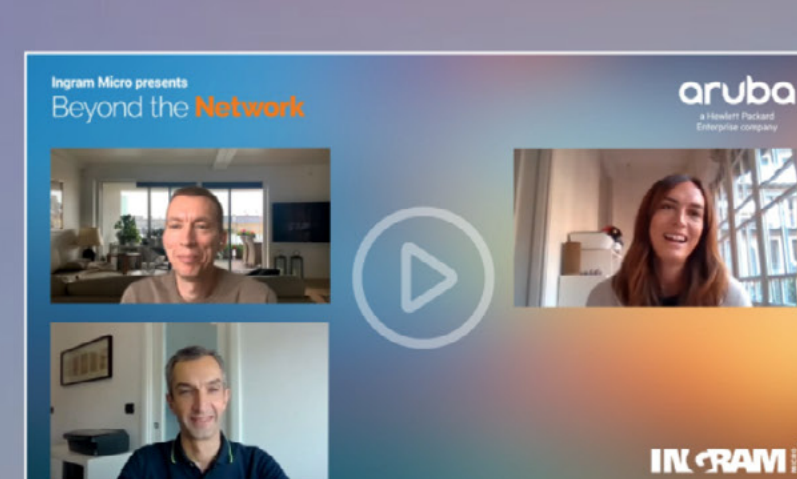

Overcome the challenges of managing a network and deliver better business outcomes for customers working at the edge and beyond!

 Siloed management of data across wired, wireless and LAN	 Users require seamless access to corporate data from the office, home or wherever they are!	 IoT and mobile devices increase risk of security breaches	 Network visibility decreases as complexity increases

## Aruba ESP

EDGE SERVICES PLATFORM

**Aruba ESP** builds on existing Aruba **network investment** with customers who have complex networking needs across **campus, branch, data centre** and **remote workers**

Aruba ESP can support more adaptable workplaces that enable remote working, social distancing requirements and Track and Trace solutions.

OFFICE	RETAIL	MANUFACTURING	HOSPITALITY
			
Connect workers wherever they are through <b>seamless video connections</b> and collaboration tools.	Create <b>personalised shopping experiences</b> through unique digital experiences.	Ensure <b>operational efficiency</b> by detecting potential problems that could result in downtime.	Provide customers with <b>mobile experiences</b> through turn-by-turn navigation and augmented reality.

## The Hybrid Workplace

The recent global pandemic has introduced additional layers of complexity to network management and increased workloads for already stretched network administrators.

We have seen a unique shift to the way we now work – from the office, remotely or a mix of both! A robust **wired, wireless or LAN** network is critical to maintaining productive environment, giving network users access to corporate resources to ensure business continuity.

By leveraging Aruba networking and the power of AI automation and insight, **Aruba ESP** is the perfect solution to ensure businesses remain operational, competitive and thrive!

WORKING REMOTELY	IN THE OFFICE	OR BOTH!
		
• Aruba Remote Access Points ensure at home wireless connectivity that is identical to the in-office experience • Ensure all devices accessing the corporate network are secure	• A location aware office helps reduce exposure to infected individuals • Ensure social distancing policies are enforced and identify areas that require deep cleaning with heat mapping	• A long-term 'new normal' hybrid workplace • Provides flexible connectivity, controls and insights related to employees wherever they are working

Speak to your dedicated **Ingram Micro Sales Specialist** who is able to advise and support every aspect of your **Aruba networking** journey.
