

THE WORLD'S MOST **SECURE INDUSTRY STANDARD SERVERS** ARE HERE!

Imagine infrastructure so intelligent, it can adapt to every workload and protect your most sensitive data, all while reducing wasteful over-provisioning.

Discover the new **HPE compute experience** that transforms how IT responds to business demands. Customers no longer need to make a choice between the demands of today or preparing for tomorrow.

Gen10 Key Benefits...

Built on HPE software-defined infrastructure and Gen10 compute platform

Most secure industry standard servers

- Unmatched threat protection through hardware root of trust, extensive standards compliance and supply chain attack detection
- Unparalleled ability to recover firmware and OS after denial of service attempt or detection of compromised code

Intelligent System Tuning

- Performance tuning to enable more workloads on more cores at a given CPU frequency for greater application licensing efficiency.
- Predictable latency reduction and balanced workload optimization

Increased in-server storage density

- Substantially greater NVMe capacity for large write intensive workloads needing advanced caching/tiering.
- Enhanced storage density in servers with more SFF and LFF drives for collaboration and database workloads.
