

# Unlocking Hybrid Success with Microsoft Teams and Surface

## Designed for Productivity and Flexibility

Microsoft Surface devices are the ultimate tools for hybrid work success. With versatile form factors, Surface empowers your teams to work, learn, and create seamlessly no matter where they are. These laptops offer high-powered productivity, putting innovation at your fingertips.

## Elevating Trust

In a world where security threats evolve rapidly, Surface provides multi-layered security covering hardware, firmware, software, applications, and identity. This comprehensive approach reduces complexity and elevates trust, ensuring your organisation stays ahead of the curve in cybersecurity.

## World-Class Security

Security is paramount in today's digital landscape. Surface devices adhere to the same rigorous security standards as all Microsoft software and services. They seamlessly integrate with the Microsoft security stack, enabling a zero-trust security model. From the hardware to the cloud, Surface ensures your data remains safe, providing peace of mind for your hybrid workforce.

## Optimised for Microsoft 365

Surface devices seamlessly integrate with Microsoft 365, enhancing your team's ability to collaborate, communicate, and create. This synergy optimises business processes, ensuring that your team can make the most of the software experiences they rely on every day.

Microsoft Teams and Surface devices are your keys to success in the era of hybrid work. They offer unparalleled productivity, world-class security, simplified management, and seamless integration with Microsoft 365. Embrace the future of work with confidence, flexibility, and trust with Microsoft Teams and Surface.

## Simplified Management for Efficiency

Surface devices are designed to simplify IT management. This translates to doing more with less – fewer resources, less complexity, and reduced associated risks. Microsoft Surface, in combination with Microsoft Endpoint Manager (MEM), offers agility in deployment and management. This standardised Surface portfolio streamlines IT operations, leading to improved efficiency, reduced overhead, and minimised downtime.
